

Dec 1, 2021

Dear patient,

We have important news. As of Dec 1<sup>st</sup>, 2021, we will be amalgamating York Fertility Centre with Markham Fertility Centre, located in the building next door at 379 Church St, 5<sup>th</sup> floor. Many of you already are familiar with Markham Fertility Centre as it is the location in which we do our sperm wash for IUI, do IVF procedures and store both embryos and sperm.

After Dec 1<sup>st</sup>, cycle monitoring, and all other procedures, will be done in that facility. Our wonderful nurses, administrative staff and laboratory professionals will be also relocating and will be there to help with your care as always. After more than 25 years of helping with couple's fertility journeys, I have decided to take a step back. My respected colleague, Dr. Meivys Garcia, who is the medical director of Markham Fertility, will assume responsibility for all active patients. Should you require follow up appointments after December 1<sup>st</sup>, please contact Dr. Garcia's office at the following number: 905-472-4484.

In making this transition, we aim to have no interruption in your care and for those of you in the cycle monitoring program, or who are waiting for IVF or embryo transfer, the timelines should remain the same.

If you have not been seen for greater than 1 year, please have your physician send a new referral to Markham Fertility Centre to both 905-472-7128 & 905-472-4994 and one of the wonderful fertility specialists at Markham Fertility will assist you.

It has been a pleasure being involved in your care during your fertility journey.

Yours sincerely,

Dr. Colette Pyselman
